

Attendance required:

WORKSHOP - PHD STUDENTS AND SUPERVISORS

FRIDAY JUNE 9, 2023 AT 09.00 – 11.00

Meeting room: 5910-214 (Agro Food Park 48, 8200 Aarhus N)

Dear PhD students and supervisors at FOOD,

Independence is key in a PhD education.

But what is it exactly? And how is it achieved?

On behalf of the PhD programme at FOOD and the Graduate School for Technical Sciences, we would like to invite all supervisors and students to this workshop.

- Through short presentations and informal discussions, this workshop gives new perspectives on how we achieve independence in a modern PhD education
- How do students and supervisor work most effectively together with independence in focus?
- How do we best protect against possible trade-offs like insecurity, imposter and lack of well-being?

Please note that this workshop was held in FOOD in January 2023. Those who participated in the workshop considered it as being very relevant. Therefore, we have kindly asked Tove to return to FOOD and to repeat the workshop for all PhD students and supervisors who missed the key messages and discussion in the January workshop.

Note that attendance is required by all PhD students and supervisors, and this workshop should be prioritized by all PhD students and their supervisors.

This workshop underpins capability development and alignment of expectations. Dispensation to attending the workshop will be given to PhD students who are on their research stay abroad on June 1, or to those who already attended the workshop in January. Any formal request for dispensation should be sent to Carl-Otto.

**If you are supervisor and expect a new PhD student to join the Department between March-June, we ask that the supervisor pre-registers both the new PhD student and themselves to this workshop, so that we can be sure that everyone is included in the key messages and discussion.

Workshop organizer:
The Graduate School for Technical Sciences/Tove H. Jørgensen

Kind regards,
Carl-Otto Ottosen
Head of Programme
